

KIDS TOOL-LESS TRAINING WHEELS FOR 12" AND 16" BIKE WHEELS

- 1.** Locate the tab on the top of the bracket. The tab should face the rear when installed.
- 2.** Fit the tab into the slot in the rear of the frame.
- 3.** Fasten the bracket to the rear axle with the split washer and knob. Tighten securely.
- 4.** Loosely attach the wheel to the bracket with the bolt, nut, washer, and locknut.
- 5.** Use the elongated mounting hole in the bracket to adjust the height of the wheel. The wheels must have a minimum clearance of 0.19 inches (5mm) from the ground.
- 6.** Secure the attachment.

⚠ WARNING

A loose or incorrect assembly can cause loss of control. Follow the instructions to correctly assemble, adjust, and tighten the training wheels. Check these conditions before every ride. Failure to properly adjust and secure the training wheels can result in serious injury or death. If you are unsure, consult your bike shop.
